

EM-H2S

HYDROGEN SULFIDE Removal System

EM-H2S Transformer

Filtronics offers several technologies to effectively remove sulfur odors. Which method you use often depends upon existing circumstances and the characteristics of the water. There is no one-size-fits-all system because the geographic locations of the wells will produce different challenges. The experienced water experts at Filtronics can analyze your water quality data and make a recommendation on the best treatment approach. With over 36 years of experience, we know what is best.

FILTRONICS EM-H2S Transformer eliminates "Rotten Egg Smell" giving odor free drinking water.

Hydrogen Sulfide can be LETHAL in high dosages.

***Treats up to 10ppm
Hydrogen Sulfide/Sulfide
with
Zero Discharge***

Features

- Flow range from 10 to 250 gpm or more
- Standard system pressures up to 150 psi
- Chemical feed/mixing
- No filter tanks
- Treats up to 10ppm Hydrogen Sulfide/Sulfide
- Zero discharge

Deluxe Features

- Skid mounted
- EM-H2S control panel
